

TWILIGHT STAR PANEL SYSTEM

GALAXY FX

The TWILIGHT'S STAR PANEL SYSTEM with special effects interprets the breathtaking experience of getting lost in the panel's beauty that seems almost too perfect to put into words. There's the recurring visual pattern of scattered dots of light—when they appear in the form of distant stars, constellations, and Northern lights—that is both calming and enchanting. It is simply as "Silence. Awe. Beauty. Peace of mind."

Add a shooting star.

Maybe it's the allure of the arc of a sparkling light trail, that brings about feelings to inspire a conscience of happiness and well being. Either way, these special effect lights connect us when all things come together creating a magical sky indoors!

Add constellations.

Star gazing is a world you can enjoy with your loved ones indoors at anytime, in the comfort of your home. Locate famous stars constellations on your own TWILIGHT STAR PANEL. Just add a small dipper, big dipper, Orion or any other constellation to your TWILIGHT STAR PANEL SYSTEM.

Add meteor shower.

Most meteor showers are spawned by comets. As a comet orbits the Sun it sheds an icy, dusty debris stream along its orbit. The uncertainty is part of its appearance is the allure. If you are ever going to install a meteor shower in your TWILIGHT STAR PANEL SYSTEM, this is the one time in your life to do it.

Add aurora borealis.

Imagine iridescent curtains of colour dancing across the night sky. The northern lights are one of the most surreal natural phenomena on earth. Life doesn't get more special than having your very own Northern lights in a home theater setting.
